They were told to the hospital last evening. They were told that the operation apparently had been successful, and that there was hope for his recovery. They were shocked greatly by the information which they had received at their home, but they were cheered somewhat by the assurance that Mr. Mathes was not in danger of immediate death, and might recover. The surgeons at the hospital said later last night that it might be several days before they could speak positively about the condition of Mr. Mathes. Bradley was in no danger, they said, and would be able to leave the hospital soon.

Associates of Mr. Mathes said last night that he was a well-educated man, and thoroughly equipped in technical knowledge for the work of superintending the construction of a large building. He was a German by birth, but had been in this country long enough to be thoroughly Americanized. He was a stern man in compelling the men under him to perform their work faithfully. He was a brainy man, and a large and powerful man physically, and he was respected by careful workmen, and feared gy the laggards. He was employed directly by Harding & Gooch, the architects of the fifteenstory building in Broadway at Murray-st., and he had overseen all the details in the construction of the buolding, since its erection was begun about eighteen months ago.
